

June 2007 Flora Sightings - Sandwich Bay Bird Observatory

On the Estate we currently have in flower **Pyramidal, Southern Marsh and Lizard Orchids** we

know of **Bee Orchids** (100+) in the local area but they are within a restricted area. Numbers of Lizard Orchids are down from last year, thought to be due to the very dry conditions earlier on but there are still small crowns coming up.

Other plants: **Stonecrop** and **Yellow Rattle** on Restharrow Dunes, **Prickly Sow Thistle**, **Sea Bindweed**, **Water Violet** in a stream near Mary Bax's, **Viper's Bugloss** and **Yellow Horned Poppy**.
