

May 2008[<< Back to Sightings](#) | [Printer friendly version](#)

During the night 27 Brown Hares were seen on Royal Cinque Ports & Prince's golf courses.

Also recorded this month so far, 11 Slow Worms, one Common Lizard and one Grass Snake all sighted in Middle Field. Elsewhere on the Estate we have habitat boards where these species hide underneath and on sunny days the lizards sit on top to catch some rays which is great for photographing. In the Big Gully one member was lucky enough to see two Bank Voles under a board, we also have Pygmy Shrews in the Elms but unfortunately the one found this month was dead.
